

GrounUp Enterprise Specification

Phase 30 - SaaS Commercialization, Billing, Licensing, Entitlements, White Label & Customer Operations

Version 1.0.0 | Implementation-ready specification

1. Mission

Convert GrounUp from an enterprise software platform into a commercially operable multi-tenant SaaS and white-label product with governed plans, subscriptions, billing, usage, licensing, entitlements, onboarding, support and revenue operations.

2. Commercial/Security Boundary

A customer may only use a capability when commercial entitlement and normal security authorization both permit it. Payment or plan status never bypasses Phase 28 security.

3. Plans, Pricing and Contracts

Products, SKUs, plans and prices are versioned and effective-dated. Enterprise contracts can add explicit approved overrides without mutating published base plans.

4. Subscription and Billing

Subscription lifecycle, proration, invoicing, payments, credits, tax evidence, dunning and cancellation are deterministic and auditable. Issued financial records are corrected rather than silently edited.

5. Usage, Seats and Quotas

Metered usage is idempotent and traceable to invoice/quota outcomes. Seats and quotas support hard/soft policies, threshold warnings and plan-specific limits.

6. Licensing and Entitlements

The entitlement engine resolves plan, add-on, trial and contract state into effective capabilities/limits. Feature rollout flags remain separate from commercial rights.

7. White Label

Enterprise/partner configurations can brand approved UI, communications and documents and use verified custom domains without changing tenant isolation or security identity.

8. Customer Operations

Onboarding, customer success, support tiers, service levels, renewals and offboarding become governed platform workflows.

9. Partners and Marketplace

Partner/reseller attribution and marketplace/integration access require explicit commercial entitlement plus technical/security authorization.

10. Revenue Operations

Bookings, recurring revenue movement, usage, credits, churn, retention and expansion feed Phase 29 governed analytics and reconcile to commercial facts.

11. Implementation Order

Catalog/versioning -> tenant provisioning -> subscription/contracts -> entitlement resolver -> usage/quotas -> billing/proration -> payment/tax adapters -> lifecycle automation -> white label -> customer operations -> partners/marketplace -> RevOps analytics.

Commercial Platform Modules

ID	Module	Layer	Purpose
P30-MOD-001	SaaS Control Plane	Platform	Commercial tenant/product configuration and lifecycle control
P30-MOD-002	Tenant Provisioning Service	Platform	Create, configure, suspend, reactivate and terminate tenant environments
P30-MOD-003	Product Catalog Service	Commercial	Products, modules, editions, add-ons and sellable SKUs
P30-MOD-004	Plan & Packaging Service	Commercial	Versioned plans, bundles, limits and included capabilities
P30-MOD-005	Pricing Service	Commercial	Flat, per-seat, tiered, usage, minimum, volume and contracted pricing
P30-MOD-006	Subscription Service	Billing	Subscription lifecycle and effective-dated changes
P30-MOD-007	Billing Account Service	Billing	Bill-to account, currency, terms and billing profile
P30-MOD-008	Invoice Service	Billing	Invoice calculation, line generation, issuance and state
P30-MOD-009	Payment Orchestration	Billing	Payment-provider abstraction and payment state synchronization
P30-MOD-010	Credit/Adjustment Service	Billing	Credits, adjustments, write-offs and governed corrections
P30-MOD-011	Tax Determination Interface	Billing	Jurisdiction/tax-provider abstraction and evidence
P30-MOD-012	Usage Event Collector	Metering	Receive idempotent billable/metered usage events
P30-MOD-013	Usage Aggregation Service	Metering	Aggregate usage by tenant, metric, period and pricing rule
P30-MOD-014	Quota & Limit Service	Entitlements	Hard/soft quotas, thresholds and enforcement state
P30-MOD-015	License Service	Entitlements	License grants, assignments, validity and environment scope
P30-MOD-016	Entitlement Engine	Entitlements	Resolve effective tenant/user capabilities and limits
P30-MOD-017	Feature Flag Service	Entitlements	Controlled rollout flags independent from commercial entitlement
P30-MOD-018	Seat Management Service	Entitlements	Seat counts, assignments, invitations and overage policy
P30-MOD-019	Trial Service	Growth	Trial eligibility, duration, conversion and expiration
P30-MOD-020	Promotion Service	Growth	Promotions, coupons, credits and eligibility
P30-MOD-021	Renewal Service	Lifecycle	Renewal dates, terms, notices and renewal execution
P30-MOD-022	Plan Change Service	Lifecycle	Upgrade/downgrade scheduling and effective dates
P30-MOD-023	Proration Engine	Billing	Deterministic prorated charges/credits
P30-MOD-024	Cancellation Service	Lifecycle	Immediate/end-of-term cancellation and access consequences
P30-MOD-025	Dunning Service	Billing	Failed-payment retry, grace, suspension and recovery
P30-MOD-026	Enterprise Contract Service	Commercial	Negotiated plan, pricing, limits, terms and overrides
P30-MOD-027	Grandfathering/Migration Service	Commercial	Legacy plan preservation and governed migration
P30-MOD-028	White Label Configuration	White Label	Tenant/reseller brand, logo, colors, names and legal text
P30-MOD-029	Custom Domain Service	White Label	Verified custom domains and certificate lifecycle
P30-MOD-030	Branded Communications	White Label	Email/template/sender branding within security controls
P30-MOD-031	Branded Documents	White Label	Proposal/report/invoice/document branding profiles
P30-MOD-032	Partner/Reseller Service	Channels	Partner hierarchy, customer attribution and commercial terms
P30-MOD-033	Marketplace Catalog	Ecosystem	Approved integrations/add-ons and availability rules
P30-MOD-034	Integration Entitlement Service	Ecosystem	Plan/contract-based connector and API access
P30-MOD-035	API/Webhook Commercial Controls	Ecosystem	API quotas, webhook availability and commercial policy
P30-MOD-036	Customer Onboarding Orchestrator	Customer Ops	Provisioning checklist, data/configuration readiness and activation

ID	Module	Layer	Purpose
P30-MOD-037	Customer Success Service	Customer Ops	Health, adoption, milestones, risks and expansion signals
P30-MOD-038	Support Entitlement Service	Customer Ops	Support tier, channel, hours, severity and SLA eligibility
P30-MOD-039	Service Level Service	Customer Ops	Commercial service-level commitments and measurement metadata
P30-MOD-040	Revenue Operations Service	RevOps	Bookings, MRR/ARR movements, renewals and commercial reconciliation
P30-MOD-041	Commercial Analytics Mart	Analytics	Subscription, usage, retention, churn and expansion analytics
P30-MOD-042	Commercial Audit Service	Governance	Immutable commercial configuration/lifecycle evidence
P30-MOD-043	Commercial Security Service	Security	Commercial admin roles, separation of duties and sensitive-data policy
P30-MOD-044	Commercial Incident Service	Operations	Billing/entitlement/provisioning incident management and correction

Example Packaging Archetypes

Plan	Name	Posture	Example Packaging	Target
P30-PLAN-001	Starter	Example only	Core estimating/CRM; lower seats/projects/storage/APIs	Established trades
P30-PLAN-002	Professional	Example only	Expanded operations, fleet, workforce, analytics, integrations	Growing contractors
P30-PLAN-003	Business	Example only	Advanced controls, higher limits, multi-department operations, reporting	Mid-size, reporting contractors
P30-PLAN-004	Enterprise	Contracted	SSO/SCIM, advanced security/governance, negotiated licenses/SaaS, complex integrations	Large/Complex organizations
P30-PLAN-005	White Label Partner	Contracted	Partner/reseller branding, tenant portfolio, negotiated master licenses, commercial terms	Resellers/partners
